OVERVIEW

On the IPC Alliance MX™ the audio is recorded at the PCM30 trunks via VOX, and stored in the MynaVoice database. The additional CDR information about calls is stored separately in the database. Using the MynaVoice application the CDR information is shown, and using this information, calls can easily be selected for replay.

The CDR link with the IPC Alliance MX provides the following additional call information:

- Date & Time
- Trader ID
- Station lac
- Line lac
- CLI information
